No matter how big or small an employer might be, when a work injury occurs, our clients have immediate obligations and can face significant exposures. Our Workers' Compensation defense attorneys are here to help with these issues.

Our attorneys represent and defend employers and their workers' compensation insurers, and self-insured employers in every aspect of work-related injury claims, including workers' compensation subrogation and Medicare compliance.

Our Workers' Compensation attorneys recognize each workers' compensation claim presents a unique set of facts requiring tailored investigation and analysis. Our experience teaches us that some claims can be resolved quickly while other claims are more complex and require alternative resolutions. We know work injuries do not occur in a vacuum and can involve employment and contract issues as well as an employee's personal struggles and we consult with colleagues in our firm's other practice groups, corporate counsel, risk managers, supervisors, and our clients to navigate the various issues and achieve the best results.

As litigators, our attorneys use their backgrounds and prior experiences to deliver creative, aggressive, comprehensive, and cost-effective defense strategies. As counselors, we collaborate with our clients to mitigate claim exposures while also providing proactive recommendations to prevent and/or minimize future risks and losses. Our attorneys are available and responsive and we maintain close communication with our clients throughout the life of a claim. However, we are also available to assist clients with general questions.

We take pride in the relationships we build with our clients and believe open and frank discussions when developing and implementing defense strategies are necessary to achieving positive results.
